## Work Experience

### Dominos Pizza | Deliverer to Keyplayer

6/2022 - Present

I started working at Dominos as a bicycle delivery driver. Here I quickly became the lead deliverer. I gained the responsibility of managing and correcting all the delivery staff. After improving even more, I got promoted to keyplayer. I can now perform any function (as insider and deliverer) and have responsibility over the entire team (except for my manager(s)).
